Google Cloud Tutorial

Andreas Eitel
Most Important! Always Stop your Instances!

Left my instance running for no reason

No more Google Cloud credits
Google Cloud Start

Build What’s Next
Better software. Faster.

- Use Google’s core infrastructure, data analytics and machine learning.
- Secure and fully featured for all enterprises.
- Committed to open source and industry leading price performance.

Register now for Next ’18
Connect with big thinkers and even bigger doers at Next ’18, our annual conference for IT leaders, developers & entrepreneurs, July 24-26 in San Francisco.

Why Google Cloud?
Starting Instances
Starting Instances
Starting Instances
Starting Instances
Use Instances only for Training
How To Work

- Anaconda, CUDA is already installed for you
- Use anaconda virtual envs
- Install pytorch in virtual anconda env
- Install other packages you need
- Use the instances for training not for coding. Instance running time is expensive.
Always Stop your Instances and Wait!
